

French Door 90

Stainless steel powder
painted cladding

Multi-function Touch Control
Panel

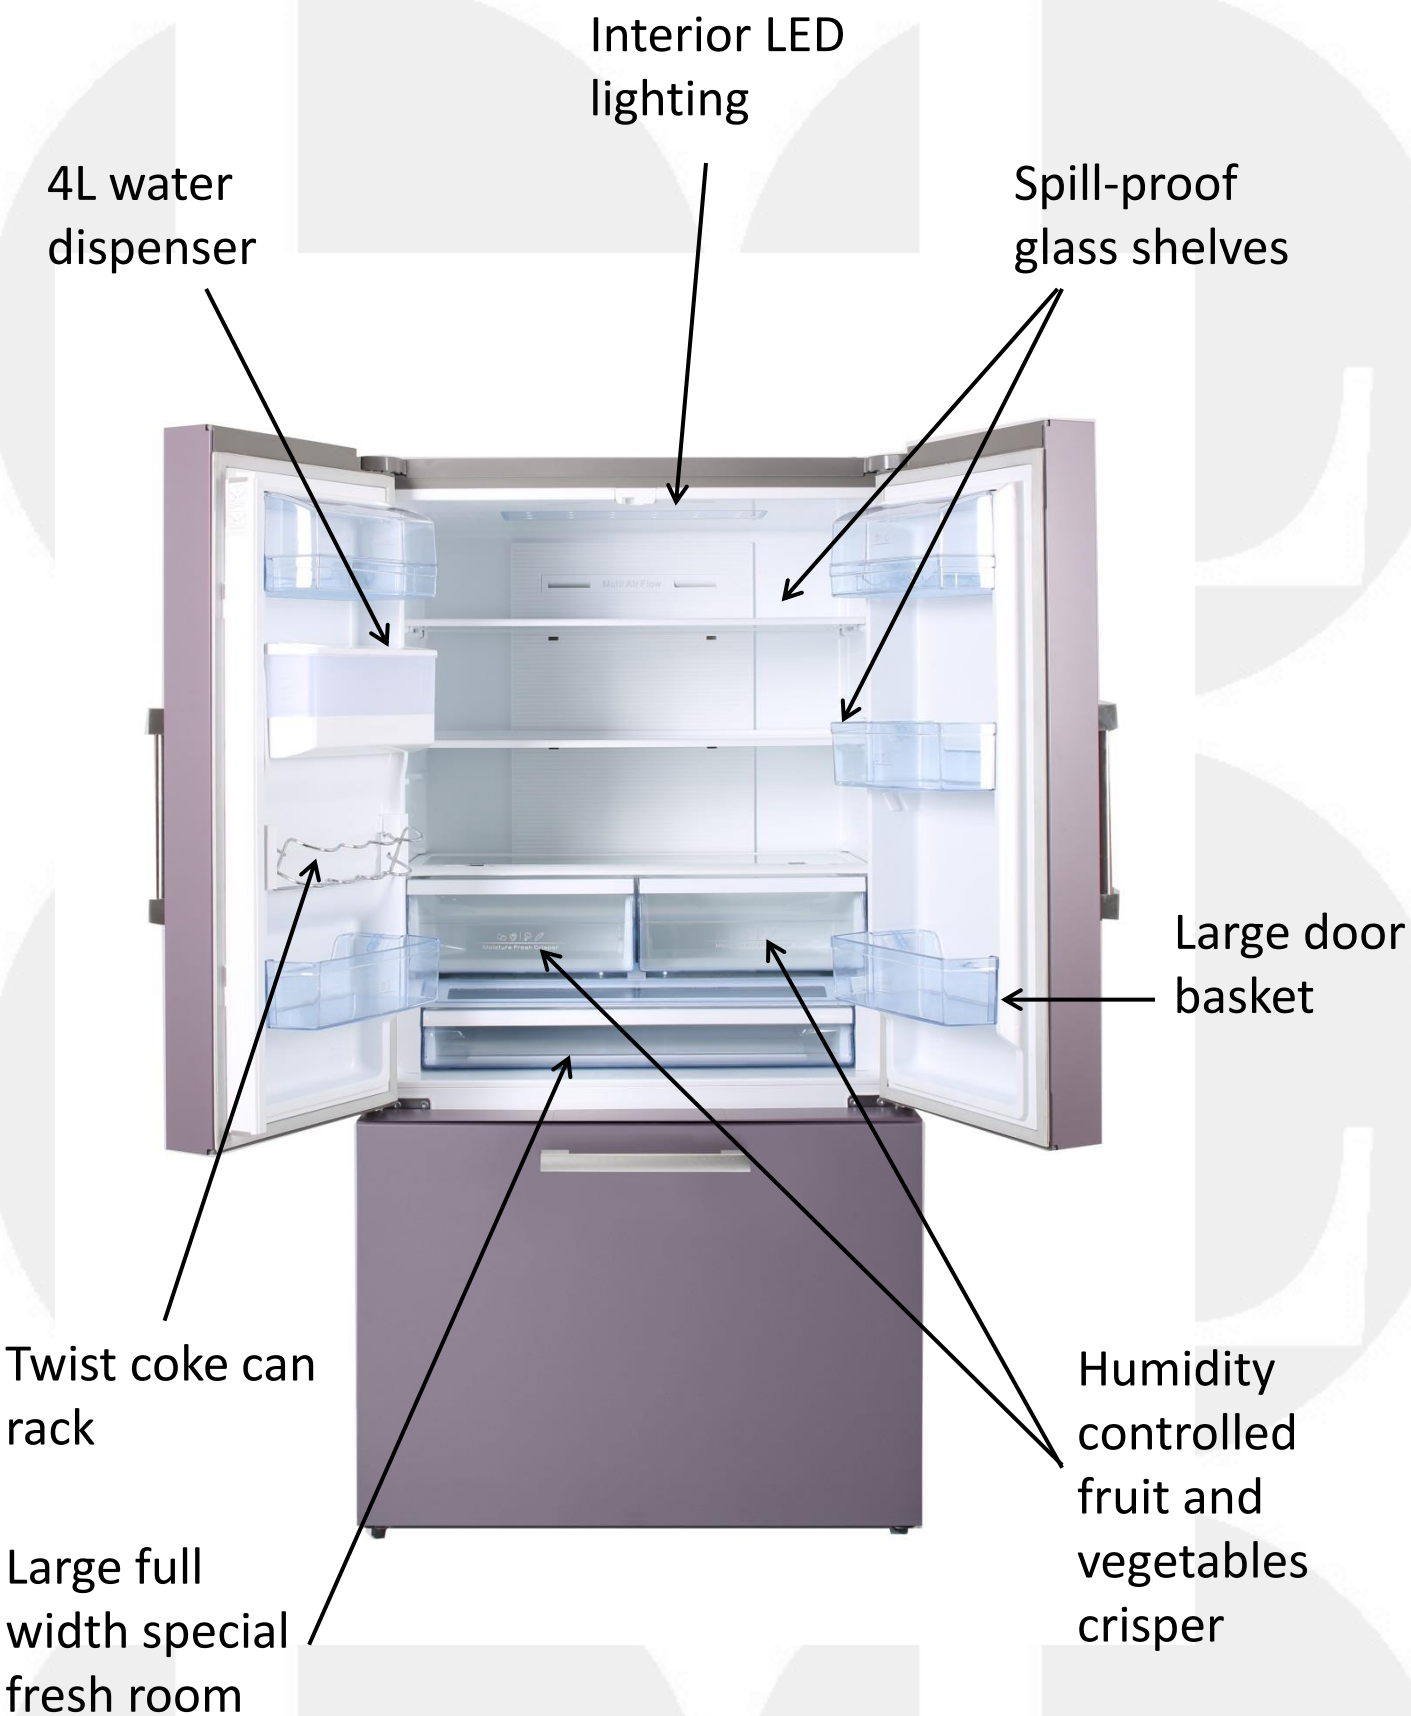

Water Dispenser

Maestro and Adagio metal
handles

Large Freezer Drawer

912 mm WIDTH
1776 mm HEIGHT
760 mm DEPTH

No Frost technology

No frost technology (also called Auto defrost or frost free) applied to refrigerators and freezers avoids the icing of the compartments

Multi-function touch control panel

Super Freeze & Super Cool
make your refrigerator more effective

Holiday
let you save power when you are on holiday

Alarm
always reminds you to close the door in order to keep inside cool, or gives you warning that temperature inside is too high.

Child lock
Avoids wrong touching

Temperatures can be controlled and set individually

Alarm

Alerts user when the door is left open or temperature inside is unusual. If the doors are left open, the temperature in the refrigerator will rise and consequently electricity is wasting. The alarm lets users know that you need to close the door, or you need to check and fix some problems.

Child-Lock

Hold the alarm button for 3 seconds to activate «child lock». This will disable the control panel to prevent accidental changes to the settings

Holiday

If you are going to be away for a long time, you can activate «holiday» option to save power. When this setting is activated, the temperature of the fridge is automatically set to 15°C

Super-Cool

«Super Cool» option could refrigerate your food faster, and keep food fresh for a longer period. The «Super Cool» option automatically switches off in 6 hours

Super-Freeze

«Super freeze» could quickly lower the freezer temperature and freeze your food faster than usual. To keep the nutrients and vitamins in food, and keep them longer. The «Super freeze» option automatically switches off in 26 hours

Interior LED lighting

The LED lighting emits less heat and is more energy efficient and environment-friendly than traditional lighting.

LED lighting brightens every corner of fridge and freezer compartments

Water dispenser

A compact refillable water dispenser placed within the door provides chilled water without taking up excessive fridge space and with no connection to plumbing

Twist coke can rack

Twist can rack
can
accomodate 4
bottles.

And you can
rotate or
remove it
when you do
not need it or
when you need
axtra space
inside the
fridge

Covered rack

The covered rack is a relatively independent individual storage space where you can store medicine, makeup and other articles which need to be stored separately

Large baskets

Adjustable large baskets provide more space to accommodate 2 bottles containing 2 liters each or 6 cans

More than 800 mm internal width

With the wide internal open space, our refrigerator offers you a fridge space perfect for your big pots and wide platters

Multi Air Flow System

Multi air flow system provides a powerful flow of air around the fridge ensuring quick cooling resulting in food staying fresher for longer, and ensures an equal amount of chilled air reaches each shelf for quick and uniform cooling

Easy-slide Freezer Drawer

You can slide out easily at any time even if it is full because of the linear guides on the drawer.

It also could be full extension so that you could take out the food easily

Freezer drawers

You can easily manage freezer space and keep your food more organised and accessible. You can find anything you want in a flash with the benefit of this design

Metal handles matching Maestro and Adagio style

Metal handles are good for touching and perfect matching with your Lancellotti kitchen environment

Humidity Controlled fruit and vegetables crisper

You could adjust the humidity inside the crisper easily to suit the type of food you are storing

Large full width special fresh room

The temperature is lower than the refrigerator compartment for storing fish, meat and sausages for a short term fresh

Moveable twist ice-maker

An innovative design which combine ice maker & ice container together without any fixing in the appliance

French Door 90
