# 90 French-Door Refrigerator

Body, doors, and drawer in  
stainless steel or painted  
stainless steel

Plumbed water dispenser

Metal handles

Wide freezer drawer

912 mm width  
1776 mm height  
760 mm depth

Surround LED lighting

Glass shelves

Full-width special fresh room

Humidity-control storage compartments

# Total No-Frost Technology

This technology (also referred to as auto-defrost or frost-free) avoids the icing of the refrigerator and freezer compartments.

# Touch-screen control panel

## Super Freeze & Super Cool

To make you fridge more efficient

## Holiday

To save power while on vacation

## Temperature control

To choose the temperature of your fridge and freezer

# Open-door alarm

It alerts the user when the door is left open, or the temperature is unusual.

When the doors are left open, the temperature in the refrigerator will rise and electricity is wasted.

# Temperature control

Using the temperature control buttons, you can choose and set the temperature:

- from  $-14^{\circ}\text{C}$  to  $-20^{\circ}\text{C}$  for the freezer;
- from  $4^{\circ}\text{C}$  to  $8^{\circ}\text{C}$  for the refrigerator.

# Holiday mode

If you plan to be away for a long time, you can activate the «holiday» function to save power. When this setting is activated, the temperature of the fridge will automatically set to 15°C.

# Super-Cool

The «Super Cool» option can cool your food faster, keeping it fresh for a longer period of time.

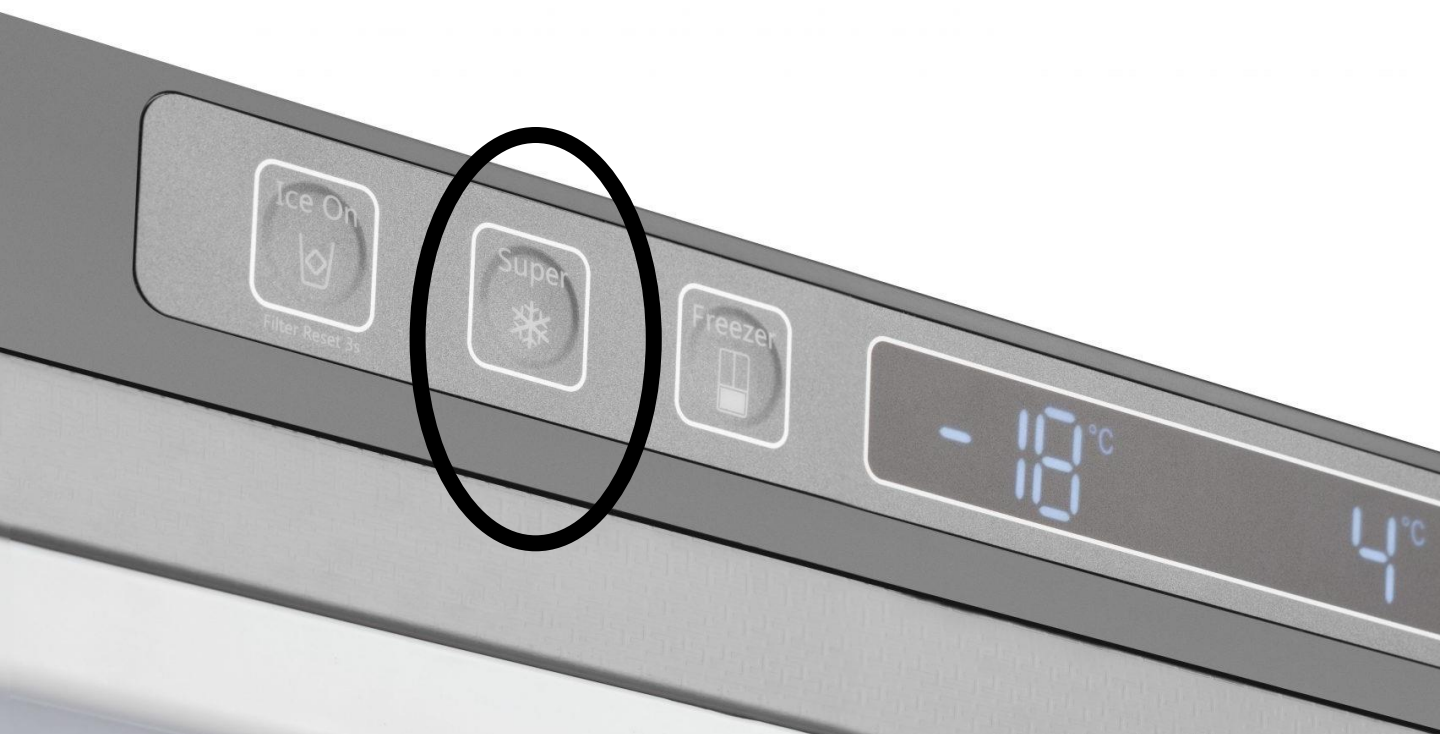

The «Super Cool» option switches off automatically in 6 hours.

# Super-Freeze

The «Super freeze» option can quickly lower the freezer temperature and freezes your food faster than usual, thus keeping it fresh and keeping the nutrients intact for a longer period of time.

The «Super freeze» option switches off automatically in 26 hours.

## Surround LED lighting

LED lighting emits less heat and is more energy-efficient and environment-friendly than traditional lighting.

LED lighting brightens every corner of the fridge and freezer compartments.

# Plumbed water dispenser

The water dispenser, positioned on the left door of the refrigerator, is directly connected to the water mains and does not need any refilling.

# 1000mm Internal Width

With a 1000mm internal width, our refrigerator provides the perfect space for big pots and large platters.

The 125° door opening guarantees optimal use of space.

# Durable Inverter Technology

- Longer life
- Less energy consumption
- Less noise

## Metal-Glide Drawers

You can slide the drawer out easily at any time even if it is full, thanks to the linear guides of the drawer.

It can also be fully extended so that you can store and take out the food even more easily.

# Humidity control crispers

You can easily adjust humidity depending on the type of food you need to store.

## Special fresh room

The temperature in this area is lower than in the rest of the fridge, allowing the perfect preservation of fish, meat, and highly perishable food.

# Ice maker

An innovative design which combines ice maker & ice container without fixing in the appliance.

This accessory is removable, if you need more storage space.
