

MADE IN ITALY

Global edition

ABOUT LANCELOTTI

1922 - Angelo Po starts his production of cooking equipment for restaurants and commercial activities in Carpi, Italy where, in 1935, he introduced his first freestanding gas stove. In 1984 his grandson Auro was hired as a young engineer in the management team of Angelo Po company, owned at that time by his father and his uncle. After 15 years, Auro decided to start his own company, Steel.

The expertise over professional equipment and the passion for steel processing is converted by Auro Po to produce freestanding stoves with professional technology for the cooking enthusiast, under the Steel brand. Today, the Steel brand is available from Europe to Australia. Steel Italy is a real family business run by four of the ten Po brothers and sisters involved daily or in the ownership.

In 2014, the family made a meaningful decision: creating a new brand that combines the Italian passion for food and design with family tradition and craftsmanship. Lancellotti (the surname of the Po's beloved mother) is registered as a new brand. Lancellotti today stands for advanced technology, design and sustainability. Robustness, high quality and technical sophistication are the core of Lancellotti products.

indoor living

ADAGIO

Colorful, sophisticated, minimal. The Adagio range includes range cookers, range hoods, refrigerators and built-in ovens in a wide shade of pastel colours (Celeste, Sabbia, Ametista, Nuvola), as well as stainless steel and Antracite. the range cookers are featured with a 9 function multifunction oven and induction or gas hob.
